ANILOX ROLLERS AND SLEEVES

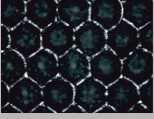

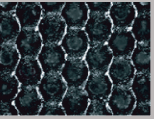

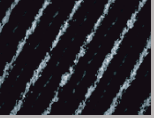

GLOBAL Flexo introduces high and anilox rollers and sleeves identified by unsurpassed quality of ceramic coatings. Cell profiles are engraved by fiber laser with changeable optics and modulation, due to that even standard applications stand out in terms of optimal cell geometry.

The product and service range of GLOBAL Flexo includes:

- new anilox rollers and sleeves
- refurbishment services along with complete reconstruction of the anilox
-

GLOBAL Flexo offers standard engravings and as well Hybrid engravings, developed for different kind of applications. These engravings allow an optimized transfer to the plate.

	<p>Multipurpose hexagonal structure of versatile manufacturing application, ultimate for screen count scope ranging from 40 to 600 lines per centimeter.</p>	<ul style="list-style-type: none"> • Standard used until many years • Wide range of screen counts available
 	<p>Elongated cell design to increase the screen count without a loss of density. For combined printing (dense solid, fine text, tone gradation + process printing).</p>	<ul style="list-style-type: none"> • Clear process printing • Plates keeps clean • Less downtime of the machine • Density can be achieved • Easy to clean
	<p>30° engraving with a channeling into the direction of rotation. This engraving type is able to avoid the problem of ink spitting with UV inks.</p>	<ul style="list-style-type: none"> • Clear process printing • No ink spitting • Density can be achieved • Easy to clean
   	<p>Open structure, applicable for large ink volumes, comes in four versions:</p> <p>+ „Uni-Line (Haschur)” used for glue, coatings, varnish and colorful printing</p> <p>+ „Uni-Line Top (Litho-Advance)” used for all high viscosity like in dry offset</p> <p>+ „Uni-Line Pack (Litho-Brilliant)” dedicated to high gloss varnishes</p> <p>+ „Uni-Line White (Ani-Opaque)” dedicated to heavy solid print and for white with high opacity</p>	<ul style="list-style-type: none"> • Open structure • Large ink volume • Less foam generation • Easy to clean

ABOUT US

The company has been a provider of tools and services for the printing industry for 4 years. It is headed by the management staff with over 15 years of professional experience. The dynamically developing company is a supplier of services and goods to Polish and foreign companies. At the beginning of its activity, the company focused mainly on providing the services of preparing for printing. To meet market expectations, it gradually developed its services and in 2019 launched the production of anilox sleeves and cylinders using the plasma metallization and direct laser light engraving technologies. The new production facility, launched at the beginning of 2020, has its own production department for aluminium base sleeves, sleeves and mould adapters, as well as a full production line for elastomeric coatings.
